

# Ground Monitoring System

**Kumwell**  
Grounding & Lightning Protection System

## Real-Time Ground Resistance Monitoring with Ground Failure Alert via SMS

The innovation for more “SAFETY” and “SAVINGS”.

### • Loosen of Ground Conductor Alarm

Triggered by loosen or disconnection of ground conductor.

### • Higher Ground Resistance Limit Alarm

Triggered by detects that the ground resistance exceeds a user-specified limit.

- Ensuring protection of persons against electrical shock
- Preventing the destruction of electrical system
- Ensuring protection against lightning and transient threat
- Reducing preventive maintenance
- The maintenance staff can correct the problem immediately
