

Lightning Detection & Warning System

Kumwell
Grounding & Lightning Protection System

Kumwell-nowcast, a joint-venture company, was established to take care of Lightning Detection and Warning System in Thailand and ASEAN under brand "Kumwell Powered by nowcast". Nowcast has developed a form of technology which allows for the precise detection of lightning strokes. The system stems from long-standing research work carried out by Professor Hans-Dieter Betz at the Ludwig-Maximilians - University in Munich, Germany. Since 1988, the lightning detection system has been successfully offered all over the world under the name of LINET.
